

WeNeedaLAW.ca Lesson 3

We Need a Law in Canada!

1. Why does WeNeedaLAW.ca take an incremental (step-by-step) approach to changing Canada's laws instead of focusing on fighting to have all abortions banned? Do you agree or disagree with this approach? Why?

2. What are 3 laws we can realistically work toward in Canada within the next 10 years? Briefly describe what each one will accomplish.

3. Outside the topic of abortion, what does being “pro-life” mean to you?

4. What is the difference between saying you’re pro-life and actually being pro-life? How will that difference impact your effectiveness in talking to others?

5. What kinds of things change your mind in an argument or discussion with someone? Do you prefer to listen to someone who is positive, enthusiastic, and passionate about their cause, or someone who is aggressive, judgmental and passionate about the same cause? How can you embody the type of activism you admire in others?

6. Some people will argue that pro-lifers only care about babies, not about women and not about children's well-being after they are born. What would you say to this?
